

Apprenticeship as an IT specialist for application development

VELOMAT Messelektronik GmbH, based in Kamenz, is a medium-sized company. For over 30 years, we have been a point of contact when it comes to specialised issues relating to measurement electronics and sensor technology. We supply national and international customers and offer customised solutions, which we can realise from prototype to series production thanks to our in-house development and production.

The apprenticeship at a glance

IT specialists for application development master programming languages like other foreign languages: from PHP to C# to Java Script. They use these to develop a wide range of in-house or customer-orientated software solutions. The content of the apprenticeship includes:

- Creating and maintaining system solutions
- System development
- Simple IT systems
- Developing and providing application systems
- IT security, data protection and copyright
- Networked IT systems

You've come to the right place if...

- You have a good secondary school leaving certificate or A-levels
- You work independently and are goal-orientated
- You have a good knowledge of maths, English, German, computer science and physics
- You are curious and enjoy working with communication and information technology

Waiting for you

- Varied activities and thorough familiarisation
- Interesting tasks
- Certificate bonus
- Financing of additional training material
- Very good chances of being taken on

Apply now and shape your future with us!
