

# Shut-off electronics

## VMV-0043

*Perfectly adjusted at the touch of a button*

**Fast.**  
**Accurate.**  
**Error-free.**

The VMV-0043 makes load monitoring easier than ever before. Instead of time-consuming adjustments, you can rely on a smart, digital solution that saves time and reduces errors.

### Why the VMV-0043?

The VMV-0043 impresses not only with its practical one-button adjustment, but also with its high precision, rapid adaptation to changing loads and robust construction for continuous operation. It integrates easily into existing systems, ensures safe shutdowns in the event of overload and reduces downtime - in short: efficient, reliable and thoroughly practical.

**Why make things complicated when they can be simple?**  
Our **VMV-0043** gets straight to the heart of your load monitoring:  
**Less adjustment.**  
**More results.**

### Your advantage in your day-to-day work

- Saves time during commissioning
- Top-hat rail enclosure for control cabinet installation
- Reduces operating errors
- Ensures stable processes
- Ideal for varying loads

### Typical applications

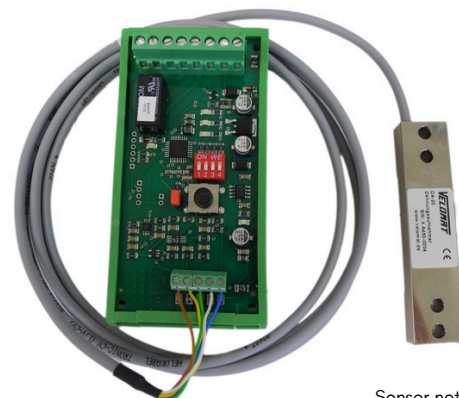

- Crane and lifting technology
- Mechanical and plant engineering
- Conveyor technology
- Test benches
- Overload protection devices

### Technical highlights

- Digital load limits
- Precise overload monitoring
- Compact & space-saving
- Robust for industrial use
- Easy system integration

Sensor not included
