Developer (m/f/d)

Electrical Engineer Automation Technology (m/f/d)

VELOMAT Messelektronik GmbH, based in Kamenz, is a medium-sized company. For more than 30 years, we have been a point of contact when it comes to specialised issues relating to measurement electronics and sensor technology. We supply national and international customers and also offer customised solutions, which we can realise from prototype to series production thanks to our in-house development and production.

Your tasks

- Realising individual work packages through to entire projects independently and as part of a team
- Development services in the areas of hardware and software for measurement and control tasks from concept creation to series production readiness
- Developing hardware and software to solve measurement and control tasks
- Customer consulting in determining the optimal metrological solution
- Supporting development projects in external certification procedures
- Coordination with the relevant specialist departments both within VELOMAT Messelektronik GmbH and with the customer

What you bring with you

- Completed studies in electrical engineering or electronics
- Sound knowledge of measurement technology, the usual methods for determining physical quantities and various MS Office programmes
- Skills in the use of CAD systems for the design of electronic and mechanical assemblies
- Programming skills in C and C++ for embedded systems or microcontrollers
- Written and spoken English
- Good analytical and conceptual skills as well as strong customer orientation

You can expect

- Varied activities and thorough familiarisation
- Responsibility and interesting tasks
- Professional and personal development opportunities
- Permanent employment contract
- Attractive salary
- Performance-related bonus payments (2 x per year)
- Company pension scheme
