

Development Engineer - Engineer Electronics / Electrical Engineering / Mechatronics (m/f/d)

VELOMAT Messelektronik GmbH based in Kamenz is a medium-sized company. For over 30 years, we have been your contact when it comes to specialised questions relating to measurement electronics and sensor technology. We supply national and international customers and also offer customised solutions, which we can realise from prototype to series production thanks to our in-house development and production.

Your tasks

- Product development from concept creation to series production in the areas of hardware and software for measurement and control systems
- Realisation of individual work packages through to entire projects independently and as part of a team
- Developing customised solutions together with the technical sales department and our customers
- Carrying out tests and commissioning for new systems
- Supporting development projects in external certification procedures

What you bring with you

- Completed studies as an engineer (m/f/d)
- Knowledge of sensor and measurement technology as well as electronics and software development
- Skills in the use of design and simulation tools for electronic and mechatronic systems
- Programming skills in the field of embedded systems
- Good written and spoken German and English skills
- Good analytical and conceptual skills as well as strong customer orientation

You can expect

- Varied activities and thorough familiarisation
- Responsibility and interesting tasks
- Professional and personal development opportunities
- Permanent employment contract
- Attractive salary
- Performance-related bonus payments
- Company pension scheme
