

# Apprenticeship as an electronics technician for devices and systems

VELOMAT Messelektronik GmbH, based in Kamenz, is a medium-sized company. For more than 30 years, we have been a point of contact when it comes to specialised issues relating to measurement electronics and sensor technology. We supply national and international customers and offer customised solutions, which we can realise from prototype to series production thanks to our in-house development and production.

An overview of the training programme

Electronics technicians for devices and systems not only produce and install a wide variety of components and small parts, but can also programme and maintain systems. In addition to practical tasks, many organisational and planning activities also play a major role. The training is deepened in the training company. The specifications may include:

- Information and communication technology devices
- Medical devices
- Automotive systems
- System components, sensors, actuators and microsystems
- EMS (Electronic Manufacturing Services)
- Measuring and testing technology

You've come to the right place if...

- You have a good secondary school leaving certificate or A-levels
- Your strengths lie in precise and accurate work
- You are technically skilful and interested
- You enjoy working in a team

You can look forward to

- Varied activities and thorough familiarisation
- Interesting tasks
- Certificate bonus
- Financing of additional training material
- Very good chances of being taken on
